Software Engineer at Infosys (SAP BTP unit) specializing in GenAI-driven SAP application development and autonomous AI agents; experienced across full-stack web, native Android, and system automation.

Experience

Software Engineer (Digital Specialist Engineer) **Jan 2026 – Present**
Infosys Ltd. – SAP NTS BTP Unit, Pocharam DC *Hyderabad, India*

- Built GenAI pipelines that autonomously generate engineering artifacts – Functional Specs, Technical Specs, and Unit Test cases – from business requirements, reducing manual authoring effort.
- Delivered end-to-end SAP BTP applications spanning UI, backend data models, and integration layers; engineered LLM prompts driving the accuracy and quality of generated documentation and code.
- Designed an autonomous **agentic AI system for invoice reversal** that recursively orchestrates tools and OData endpoints to resolve dependencies until each invoice is successfully reversed.
- Drove feature R&D, taking new capabilities from proof-of-concept to production implementation.

Software Engineering Trainee **Jul 2025 – Dec 2025**
Infosys Ltd. – MERN Full-Stack (Mysuru) & SAP BTP Enablement (Chennai) *India*

- Completed structured enablement in MERN full-stack development and the SAP BTP stack (CAP, UI5/Fiori, OData, XSUAA), building hands-on projects prior to project allocation.

Technical Skills

Programming Languages:	Python, JavaScript, TypeScript, Kotlin, SQL, Bash.
SAP BTP & GenAI:	SAP CAP (Node.js), UI5/Fiori, OData, XSUAA, SAP AI Core, Integration Suite; LLM Prompt Engineering, RAG, Agentic & Autonomous AI Agents.
Frameworks & Libraries:	Django, React, Node.js, Jetpack Compose, Android NDK/JNI, Docker, Git, GitHub Actions (CI/CD), Asyncio, Buildozer.
Databases:	SAP HANA, MongoDB, SQL, SQLite.
Core Competencies:	Data Structures & Algorithms, Full-Stack Development, Native Android Development, System Automation, Microservices.
Soft Skills:	Problem-Solving, Communication, Adaptability, Collaboration, Time Management.

Projects

FrameFlow Player – Advanced Android Video Player **Kotlin, Jetpack Compose, C/C++ (JNI/NDK), libmpv, VapourSynth, Python.**
Native Android video player integrating `libmpv` with VapourSynth/svpflow for real-time frame interpolation (SVP-class smoothing). Bridged C/C++ media libraries to Kotlin via JNI/NDK (OpenGL ES rendering) with a Jetpack Compose (Material You) gesture UI and an adaptive quality ladder.

Shizuku Toolbox – Privileged Android System Toolbox **Kotlin, Jetpack Compose, Shizuku API, Android AIDL/IPC.**
No-root system utility leveraging the Shizuku (ADB-level) API for privileged Android operations – bloatware removal, runtime permission and AppOps management, timed permission grants, a secure-settings editor, and a screen color-filter overlay service.

TvToolsPro – Open-Source Android TV Control Suite **Kotlin, Jetpack Compose, REST API, ADB, Ktor.**
Open-source Android TV management suite with a client–server architecture and REST API for remote device control; reverse-engineered an existing closed-source tool to design a feature-complete, unrestricted open alternative.

MetroNavigator Web Application **Python, Django, Docker, NetworkX, Dijkstra's Algorithm, JavaScript.**
Django metro route optimizer (Dijkstra over a NetworkX graph) that cut journey-planning time by 70% in simulated tests, with Docker containerization reducing deployment setup time by 85%.

Education

Gokaraju Rangaraju Institute of Engineering and Technology, Hyderabad October 2021 – June 2025
B.Tech – Computer Science and Engineering *CGPA: 8.19/10*

Coding Profiles

Leetcode `:user5777yx (Rating: 1805, 400+ problems)` **Hackerrank** `:21241A05Z4 (6 Star Rating)`
Interviewbit `:deekshith-b_240 (Score: 24897+)` **Codechef** `:deekshith2124 (Rating: 1565)`

Certifications

MERN Full Stack (Infosys) | SAP BTP AI and Automation (Infosys) | DevOps CI/CD (Infosys) | CyberSecurity (Coursera) | SQL Advanced (HackerRank) | Data Analytics with Python (NPTEL) | Android Developer Internship (AICTE) | NDG Linux Essentials (Cisco).

Achievements and Activities

- Built and maintain **30+ open-source projects** (**600+ GitHub contributions**) across full-stack, Android, and automation.
- Ranked in the **top 10% on LeetCode** with **400+ solved problems**, demonstrating strong algorithmic skills.
- Optimized **Buildozer/Gradle pipelines** to resolve 200+ Android build issues; built a GitHub Actions system-diagnostics tool.
